Frontend Developer | Software Engineer

Professional Summary

Frontend Developer with 1.4+ years of experience building scalable, high-performance web applications using React.js, Next.js, TypeScript, and JavaScript. Skilled in translating Figma wireframes into pixel-perfect, responsive UIs and integrating RESTful APIs with efficient state management. Delivered real-world SaaS products across EHS, AI chatbot, fintech, franchise management, and stock trading domains. Strong focus on clean code, reusable component architecture, and collaborative agile delivery.

Skills

React & Core: React.js (Hooks, Context, Memo, Lazy), JSX, Component-Driven Architecture

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

State Management: Zustand, TanStack Query (React Query)

Styling & UI: Tailwind CSS, Shadcn UI, Radix UI, Framer Motion, Responsive & Pixel-Perfect UI

APIs & Integration: RESTful APIs, Axios, Yup Form Validation, JSON

Next.js: SSR, SSG, App Router, Pages Router

Tools & DevOps: Git, GitHub Actions (CI/CD), Vercel, Vite, Figma, Postman

Methodologies: Agile / Scrum, Component-Driven Development, Cross-Browser Compatibility

Work Experience

Web Developer – Vivansh InfoTech,

Apr 2025 – Present

- Architected and delivered scalable frontend applications using React.js, Next.js, TypeScript, and Tailwind CSS, improving UI consistency and maintainability across 3+ concurrent client projects.
- Engineered reusable, component-driven UI libraries that streamlined development workflows, accelerating sprint velocity and feature delivery timelines.
- Integrated RESTful APIs using Axios and TanStack Query, implementing intelligent caching and data-fetching strategies that improved application responsiveness and reduced redundant network requests.
- Improved Lighthouse performance scores through lazy loading, code splitting, and frontend optimisation techniques, delivering measurably faster load times across desktop and mobile.
- Collaborated cross-functionally with UI/UX designers and backend engineers within agile sprint cycles to ship responsive, cross-browser compatible production features on schedule.
- Enforced accessibility (WCAG) standards and responsive layout practices, contributing to improved user engagement across diverse device environments.

Web Developer Intern – Vivansh InfoTech,

Jan 2025 – Mar 2025

- Translated Figma design specifications into pixel-perfect, production-ready responsive interfaces using React.js and Tailwind CSS, meeting strict design fidelity benchmarks.
- Developed modular, reusable UI components following component-driven development principles, reducing code redundancy and improving team-wide consistency.
- Integrated third-party APIs and implemented form validation using Yup, improving frontend reliability and data integrity across user-facing workflows.
- Participated in agile ceremonies, Git-based version control workflows, and code review processes within a collaborative engineering team.

AI-Powered Projects (Frontend / API Integration)

AI Chatbot & Report Intelligence — Capability.work

React.js · Next.js · TypeScript · Tailwind CSS · Claude API · RAG · Vector DB · Zustand

- Integrated an AI chatbot connected to the Claude API with RAG (Retrieval-Augmented Generation) and a vector database, delivering contextually accurate, domain-specific answers within the EHS platform.
- Built an AI Report Summary feature where users upload EHS reports and the Claude API analyses content, generates a structured summary, and provides actionable suggestions and safety recommendations.
- Developed dynamic AI-driven form flows where Claude API generates intelligent follow-up questions based on user context and prior answers, with an answer quality rating system for structured feedback collection.
- Built a human support handoff interface with a waiting room UI and live agent join room, enabling seamless escalation from AI to human support mid-conversation with real-time push notifications.

Key Projects

Capability.work — EHS Training & Work Management Platform

React.js · Next.js · TypeScript · Tailwind CSS · TanStack Query · Zustand · Shadcn UI

- Developed scalable frontend modules for EHS training management, compliance tracking, incident reporting, and work permit workflows serving enterprise clients.
- Built dynamic dashboards and course management interfaces with data-rich tables, filtering, and real-time status updates using fully accessible, responsive UI components.
- Optimised rendering performance using React memoisation patterns and reusable component libraries, reducing render cycles and improving long-term scalability.

Kuber Grow — Stock Order & Pricing Management Platform

React.js · TypeScript · Tailwind CSS · TanStack Query · Axios

- Developed frontend workflows for bulk stock ordering, pricing management, and real-time financial transaction processing, handling complex UI logic for high-volume data operations.
- Implemented accurate pricing calculation engines with real-time financial data handling and validation, ensuring transactional integrity across ordering workflows.
- Improved rendering performance for large datasets by applying optimised state management strategies, ensuring smooth UX at scale.

Education

B.Tech Computer Engineering – Government Engineering College, Rajkot

Jun 2021 – May 2025

Gujarat Technological University | CGPA: 8.69 / 10.0

Certifications

- Frontend Development (React.js, TypeScript, Tailwind) — Practical Training Certification by Vivansh Infotech Private Limited
- Cyber Security — Certified Training by Atlas Cyber Security Platform
